Technical Sheet

High visibility rain cover

Description :

Designed for outdoor professionals, this rain cover can be installed in seconds on backpacks.
Its durable, water-repellent fabric provides reliable protection even in heavy rain. The cover offers maximum visibility day and night thanks to its fluorescent fabric and 3M reflective strips, certified to EN ISO 20471:2013.
Available in three sizes (25L, 38L and 65L) and in two high-visibility colors (yellow or orange), it adapts to all field needs.

WATERPROOF HV PROTECTIVE COVER

Water-repellent surface

Fluorescent and high visibility material, certified EN ISO 20471:2013

Available in three sizes
(25L, 38L and 65L)

Box of 50 pieces
L 60 cm x l 35 cm x h 45 cm
Customs code: 6307901000

GUARANTEE

5 years

WASHING

Recommended washing instructions:

- *empty the bag before starting bag maintenance.*
- *dusting: use a brush or vacuum cleaner.*
- *moistening: using a damp brush, lightly wet your bag.*
- *Cleaning: Apply mild soap to the bag and use a brush to clean stains.*
- *Stain treatment: For hard-to-reach or heavily soiled areas, use a toothbrush instead. For greater effectiveness, let the soap sit for a few minutes.*

Recommended drying instructions:

- *Do not use a washing machine, dryer or hair dryer.*
- *Air dry your bag. Do not expose it to direct heat, as this can distort the bag's materials. Sunlight can also alter the colors and accelerate the aging of the bag.*
- *If possible, dry the bag upside down on a clothesline. This will allow air to circulate more freely within the bag, promoting quick and even drying.*
- *Post-drying maintenance: to improve its water resistance, you can waterproof it.*
