Technical Sheet

65L high visibility backpack

Description :

Surflex offers high-visibility backpacks for outdoor work, combining durability and ergonomics. Made from recycled materials, they comply with the EN ISO 20471:2013 standard for optimal visibility. Water-repellent and equipped with a rain cover, these 65-liter bags offer ample space for workwear, which can be stored separately. A separate compartment provides additional space for a helmet, while shoes can be stored at the bottom of the backpack. The high-visibility backpack combines comfort and safety, ideal for intensive workdays.

GUARANTEE

5 years

WASHING

Recommended washing instructions:

- *empty the bag before starting bag maintenance.*
- *dusting: use a brush or vacuum cleaner.*
- *moistening: using a damp brush, lightly wet your bag.*
- *Cleaning: Apply mild soap to the bag and use a brush to clean stains.*
- *Stain treatment: For hard-to-reach or heavily soiled areas, use a toothbrush instead. For greater effectiveness, let the soap sit for a few minutes.*

Recommended drying instructions:

- *Do not use a washing machine, dryer or hair dryer.*
- *Air dry your bag. Do not expose it to direct heat, as this can distort the bag's materials. Sunlight can also alter the colors and accelerate the aging of the bag.*
- *If possible, dry the bag upside down on a clothesline. This will allow air to circulate more freely within the bag, promoting quick and even drying.*
- *Post-drying maintenance: to improve its water resistance, you can waterproof it.*
