Technical Sheet

REFRESHING CAP

Description :

Cooling cap: an effective solution for cooling down quickly during heat waves.

To use it, **simply wet the cap with room-temperature water** (no need for cold water), wring it out, and then shake it. You'll feel a cool feeling that can reduce the temperature by up to 15°C below room temperature.

How to enable refresh?

Soak in water

Squeeze out excess water

Immediate cooling

REFERENCE

Black | CALC01

MATERIALS

90% Nylon / 10% Spandex

MAINTENANCE

Hand wash or machine wash at 30°C on a normal cycle.
Do not bleach.
Do not tumble dry or iron.
Professional cleaning prohibited.
