Technical Sheet

REFRESHING TOWEL

Description :

Ideal for summer, this Surflex cooling towel has been designed to provide **immediate cooling** in hot weather. Simply **wet** it (room temperature water is sufficient), **wring it out**, then **shake it out** and place it on your body. It allows you to feel a **drop in temperature of up to 15°C** compared to room temperature.

The cooling effect lasts as long as the towel remains damp; by wetting it, wringing it out, and then shaking it, you can enjoy its cooling properties again.
Made from **UPF 50+ fabric**, it effectively protects you against the sun's UV rays.

Ultra absorbent and breathable, anti-perspiration

Refresh up to 15°C: wet, wring out, refresh.

Evaporative cooling material

Available colors: Orange Blue

How to enable refresh?

Soak in water

Squeeze out excess water

Immediate cooling

REFERENCE

Blue	TOWC02
Orange	TOWC06

MATTER

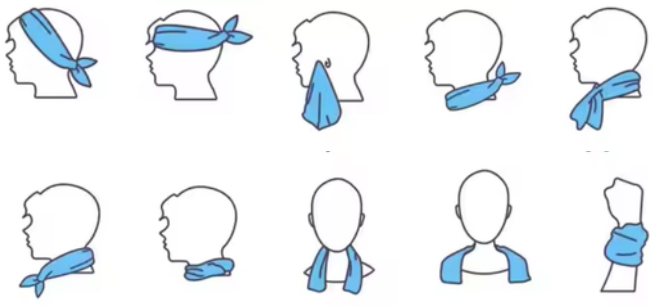

100% Microfiber

SIZE

100 x 30cm

MAINTENANCE

30C
