Good resistance to shocks, weathering, cold (-20°C) and heat (+65°C).

Approved by the FDA/BGA for direct food contact and medical applications

Excellent resistance to chemicals, solvents, detergents, oils and greases

Fire resistance classification: "flame-resistant"

REFERENCE VIS

GROSS WEIGHT 115 G

MATTER PETG = Glycolized Polyethylene Terephthalate

DIMENSIONS

Customs code: 3920109090

Length: **42 cm**
Height: **22 cm**
Thickness: 1mm

Option & compatibility

Optional add-on

The face shield is an option to be used in conjunction with a compatible safety cap.

Visor reference: VIS The VIS reference must be added to the reference of the safety cap chosen when ordering.

The cap must be prepared in advance (installation of snap fasteners).

The visor cannot be added after purchase on a standard cap.

Compatibility & ease of use

To limit fogging, the visor is more suitable for caps that offer a space greater than 5 cm between the visor and the face, promoting better air circulation.

Fiche Technique

Lift-up anti-splash visor

ASSEMBLY

1 Adjust the cap

Adjust the cap to fit your head size properly.
Make sure it holds securely on your head.

2 Remove the protective films

Remove the protective film from both sides of the shield.

Like all transparent products, the shield is **prone to scratches**: **handle with care.**

3 Limit fogging

To limit fogging, gently wipe the **inner side** of the shield with a **soft cloth dampened with dish soap.**

Then wipe with a **soft cloth.**

Repeat as needed for cleaning.

4 Position the stopper

Place the SURFLEX stopper onto the shield.

IMPORTANT :

- The SURFLEX logo must **be** on the **outer side of** the shield
- The **smooth side** must face **outwards**

Gently bend the shield and insert the **stopper until it snaps securely,** to ensure the snap buttons are in the correct orientation to fasten onto the cap.

5 Attach the shield

Press the **snap buttons** on each side of the cap until they snap into place.
